

Self Adhesive Vinyl

Make a big impression on any occasion:

Adhesive Vinyl: moveable and resilient images in brilliant colour

The product is a printable, self-adhesive vinyl material made from cellulose and polyester and can be safely placed on walls, doors, windows and other surfaces without damaging them. You can also adhere the material to curves and corners to create an amazing wrap-around effect. And best of all, our vinyl prints can be repeatedly removed, repositioned and reused, which gives you a tremendous degree of flexibility. Additionally, the special adhesive material prevents wrinkles, air pockets and surface damage. As such, with Brush Strokes self-adhesive vinyl posters you can safely decorate any room, indoor or outdoor, with your favorite digital images.

Robust and Versatile

The vinyl fabric is water-, weather- and UV-resistant, and therefore great for indoor or outdoor use. The backing is self-adhesive and removable so you can easily reuse it over and over again. And because the backing leaves behind no residue, you can rest assured any surface you stick it to will not be damaged.
